

Energy Consulting

Energy Consulting

Deregulation and other changes in the energy markets have sent prices soaring, leaving most U.S. companies suffering from ever-rising energy costs that sap company earnings. However, few small and medium-sized companies are taking all the steps they can to reduce their utility expenses.

Did you know?

Most companies are being overcharged for utilities and telecommunications. Electricity unit costs (/kw) can usually be decreased.

We specialize in analyzing:

Water/Sewage

Natural Gas

Telecom

Electricity

Energy Consulting

ENERGY SOLUTIONS, a certified energy consultant, provides executive consulting services that incorporates the latest energy expertise to determine how your company may take advantage of green energy conservation methods, help you eliminate unnecessary costs by discovering billing errors and overcharges, and by ensuring that you are getting the best rates available.

Utility charges CAN be reduced!

**ENERGY SOLUTIONS performs on a contingency fee basis—
there are NO up-front costs or out-of-pocket expenses.**

We are paid *only* when you see savings on your utility and telecom bills.*

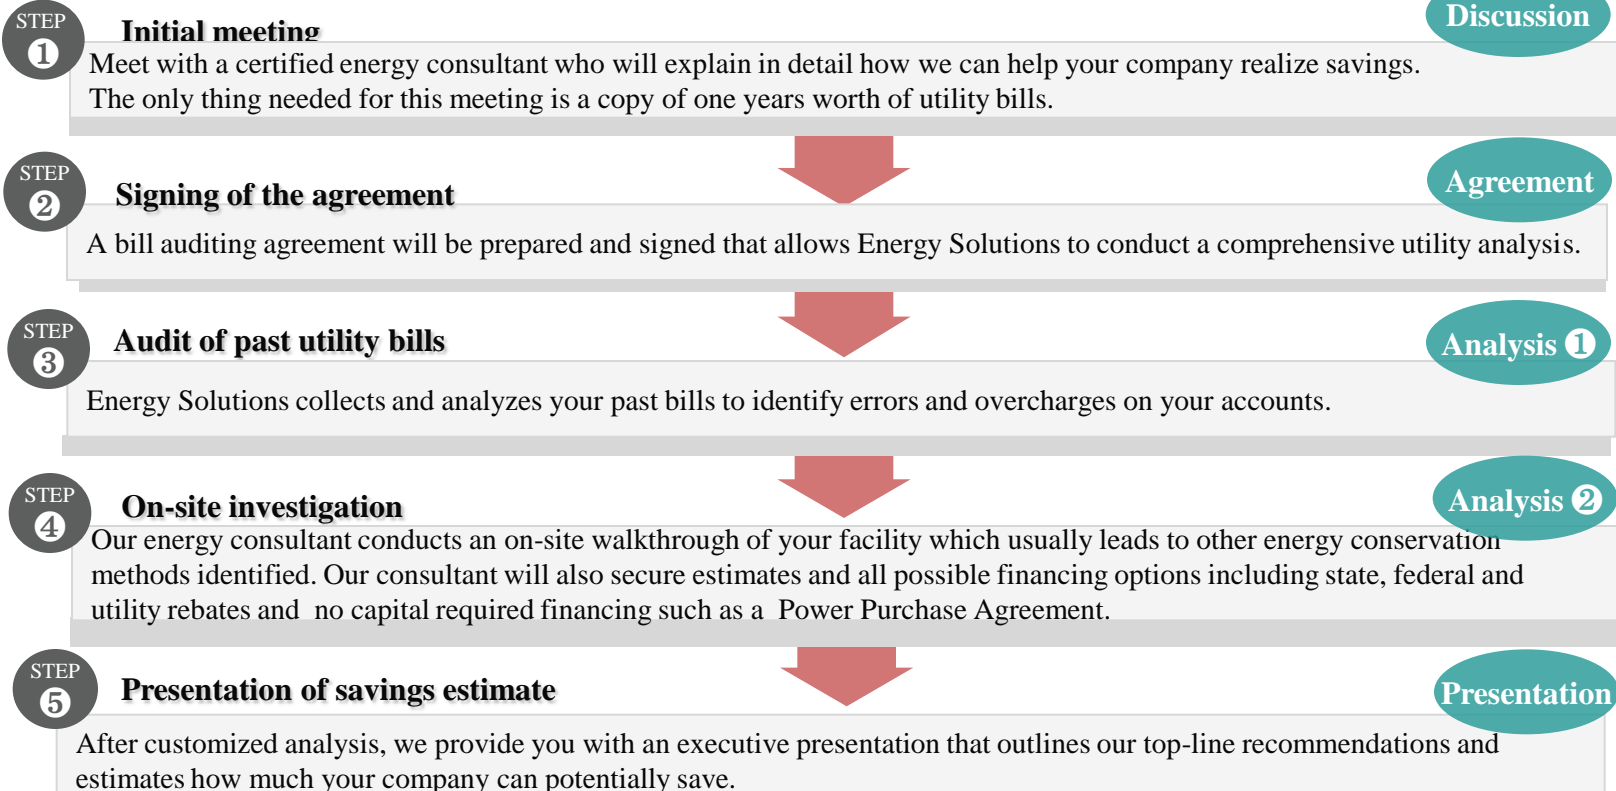

“No Results . . . No Fee”

All consultation fees are derived from a share of the savings realized from our negotiations with utility companies and/or the implementation of our cost-cutting recommendations, and can be negotiated as a pure retainer or a percentage of your savings.

• Clients outside of the tri-state area (NY, NJ, CT) will be billed for transportation and related travel expenses.
